Program/Curriculum Review

Each institution is responsible for the courses taught in its respective level of instruction. Many of the lower division general education courses are commonly numbered and described within the University System of Georgia. At least every five years, the Associate Dean of Health Sciences from Georgia Southwestern State University will meet with the Dean of Academic Affairs for Georgia Piedmont Technical College to consider curriculum, recruitment, admission requirements and transfer of credits. They will also be in frequent contact to address any problems that may arise and to insure the continued success of the transfer of students into the LTCM program.

Admissions

Students must satisfy the admission requirements of Georgia Southwestern State University to enter the LTCM degree program. In order to smoothly transition between institutions and to maximize transfer credit, students should submit all required admission documents and designate "Long Term Care Management" as the desired field of study. Any student who might experience a transfer problem in this program will go to the program coordinator at GPTC who will communicate with the appropriate officials at GSW to resolve the problem.

Program Coordination

Georgia Piedmont Technical College will assign an acceptable staff member as Coordinator for the Georgia Southwestern State University degree program in Long Term Care Management. The Coordinator is responsible for promoting the LTCM program on the GPTC campus, for advising students interested in the LTCM program, and for providing information to GPTC
