

What to do if you were potentially exposed to COVID-19

Get tested 3-5 days after possible exposure

Do you feel sick?

YES

Vaccinated?

YES

NO

YES

Vaccinated?

NO

- Seek medical attention, telling provider you may have COVID
- Isolate at home for 10 days
- Follow doctor's orders

For more info, visit the CDC site below
[When You've Been Fully Vaccinated | CDC](#)

- Stay home except to get medical care
- Rest, stay hydrated, use over-the-counter medication if needed
- Stay in touch with your doctor; should you need medical assistance, let your provider know immediately that you may have COVID
- Avoid public transportation
- Separate yourself from other people
- Notify close contacts of your situation
- Monitor your symptoms, looking for **emergency warning signs** (trouble breathing, persistent pain or pressure in the chest, new confusion, inability to wake or stay awake, and pale, gray, or blue-colored skin, lips or nail beds).
- Seek immediate medical attention if necessary

[What to Do If You Are Sick | CDC](#)

- Wear your mask indoors for 14 days
- Social distance when possible
- Wash hands often
- Monitor symptoms for 14 days
- You are NOT required to quarantine as long as you are NOT an inpatient or resident in a healthcare congregate setting

- Quarantine at home for 14 days except in case of emergency or to get tested.
- You may leave quarantine after 7 days IF
 - You do NOT live in a congregate setting
 - It has been at least 7 days since exposure
 - You remain symptom-free
 - You are diagnostically tested no more than 48 hours before end of quarantine but not before day 5
 - You receive a negative result
- If you are unable to get tested, you may discontinue quarantine after 10 days - IF no symptoms have emerged
